

① Polarization of Light :

Restriction
of osc of light ($\vec{E}$)
in one plane only
(Plane of osc)

② Circularly & Elliptically
Polarized light :

PG

Physics Galaxy
Videos

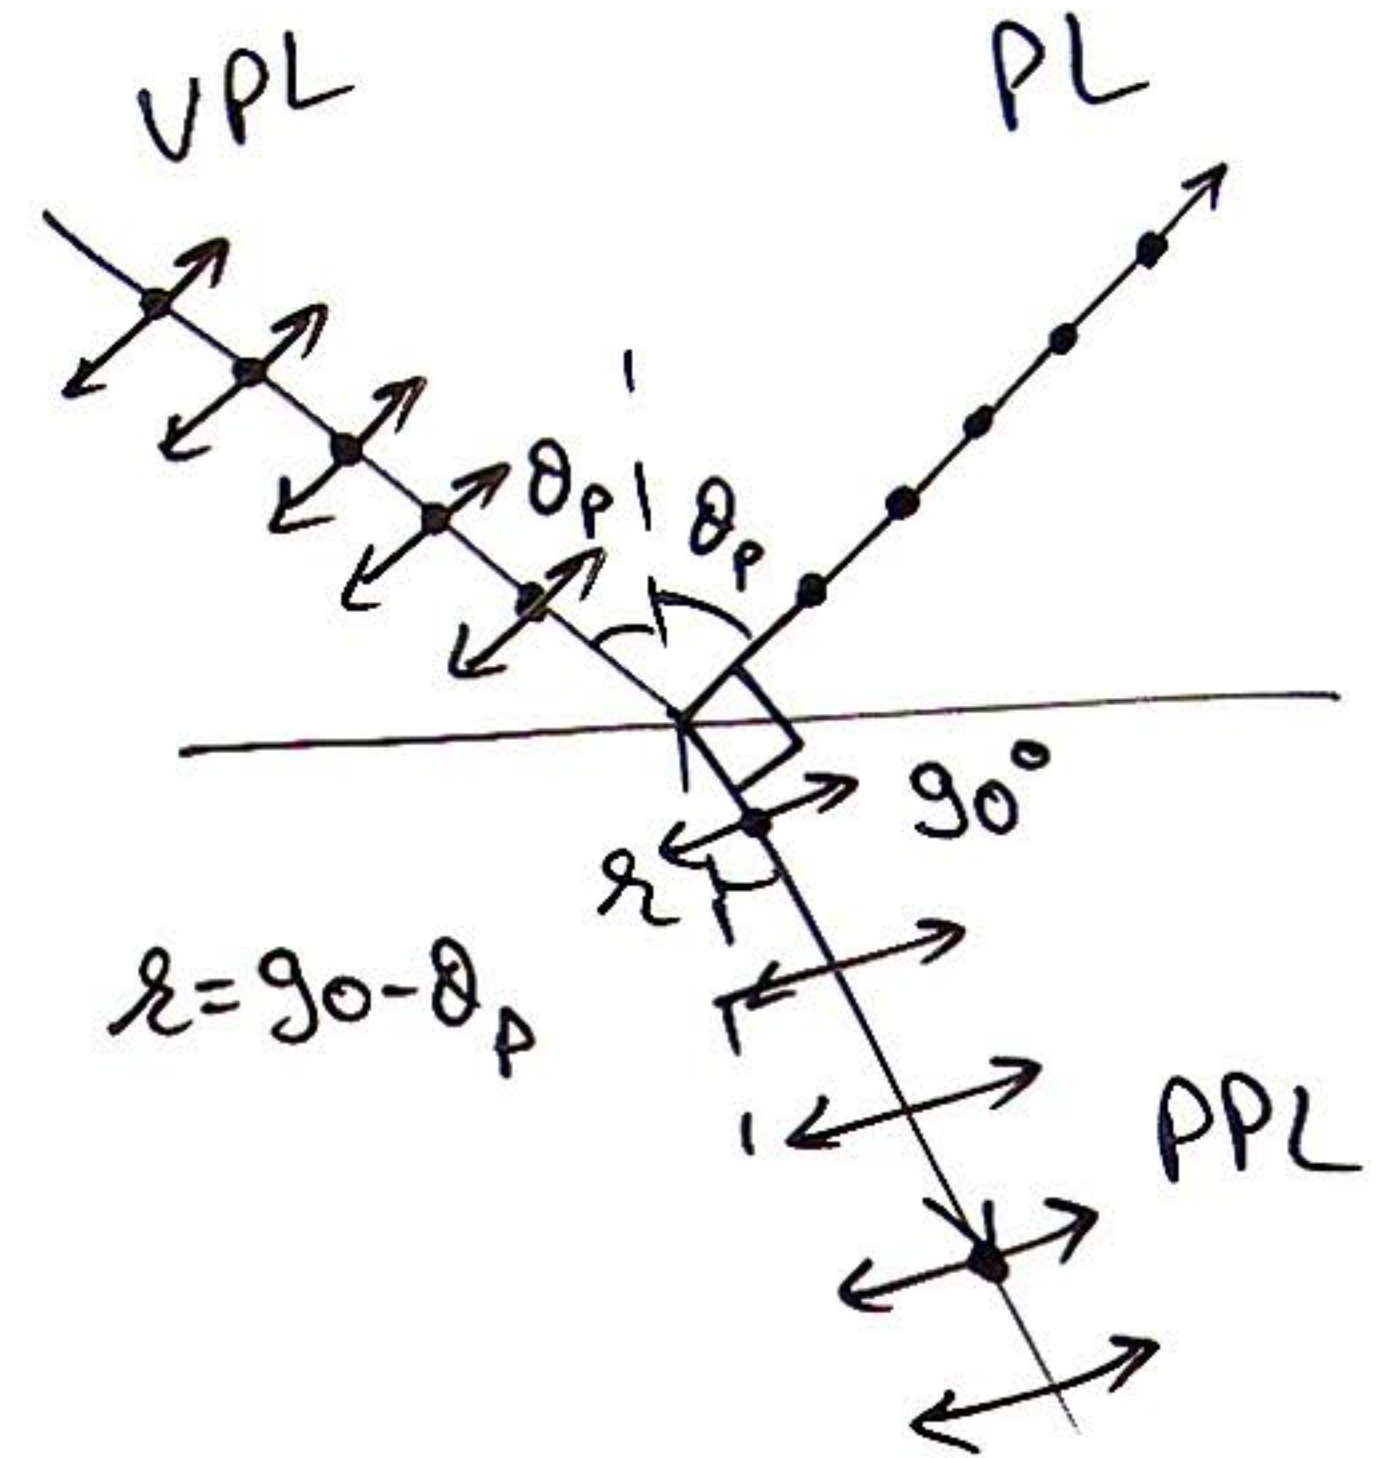

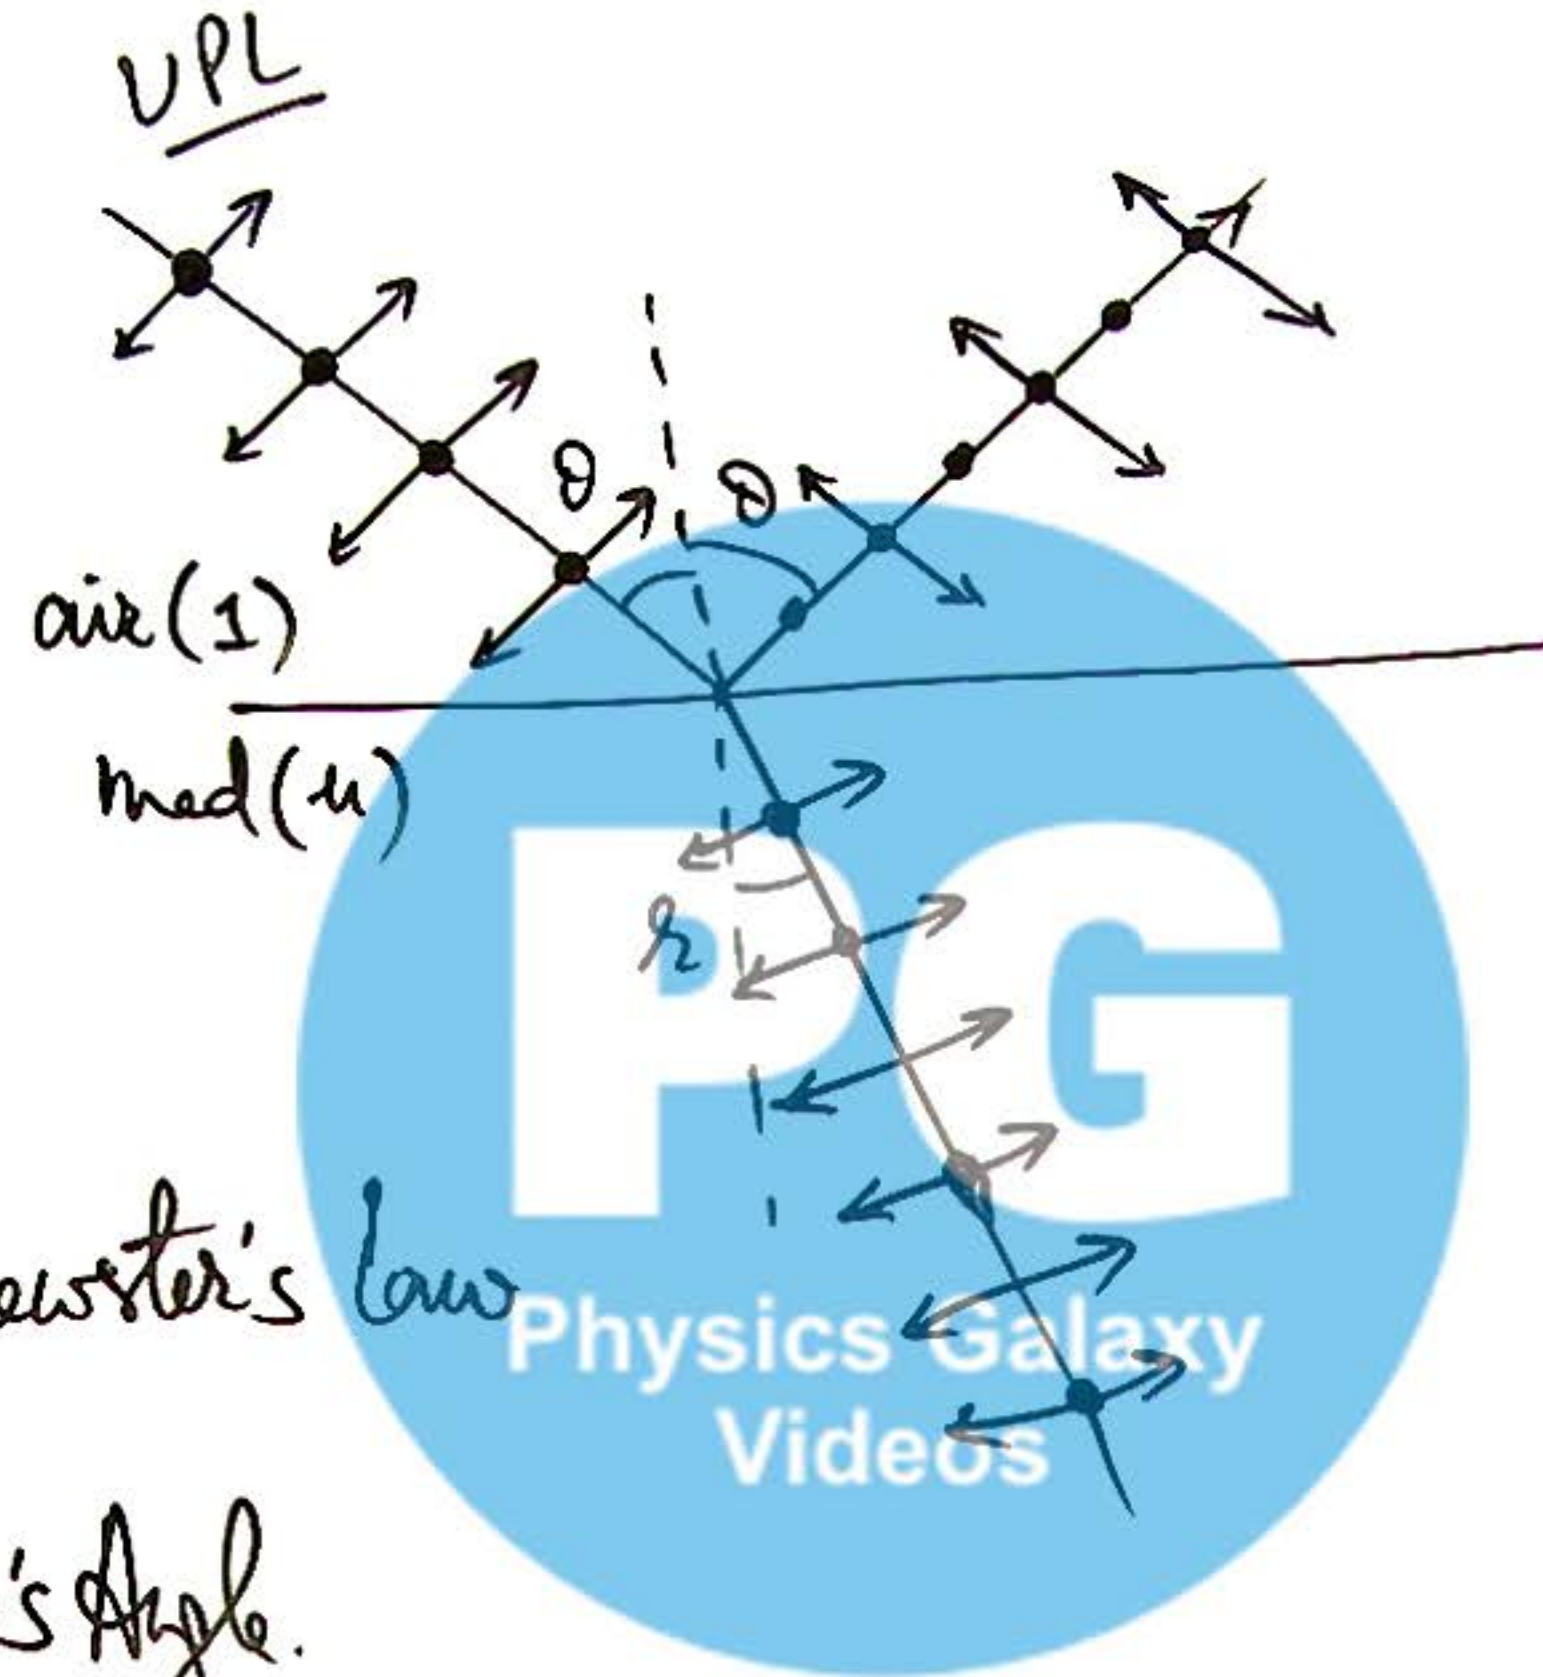

③ Methods of Polarization of Light :

(i) Polarization by Reflection

by Snell's law
 $\sin \theta = \mu \sin r$

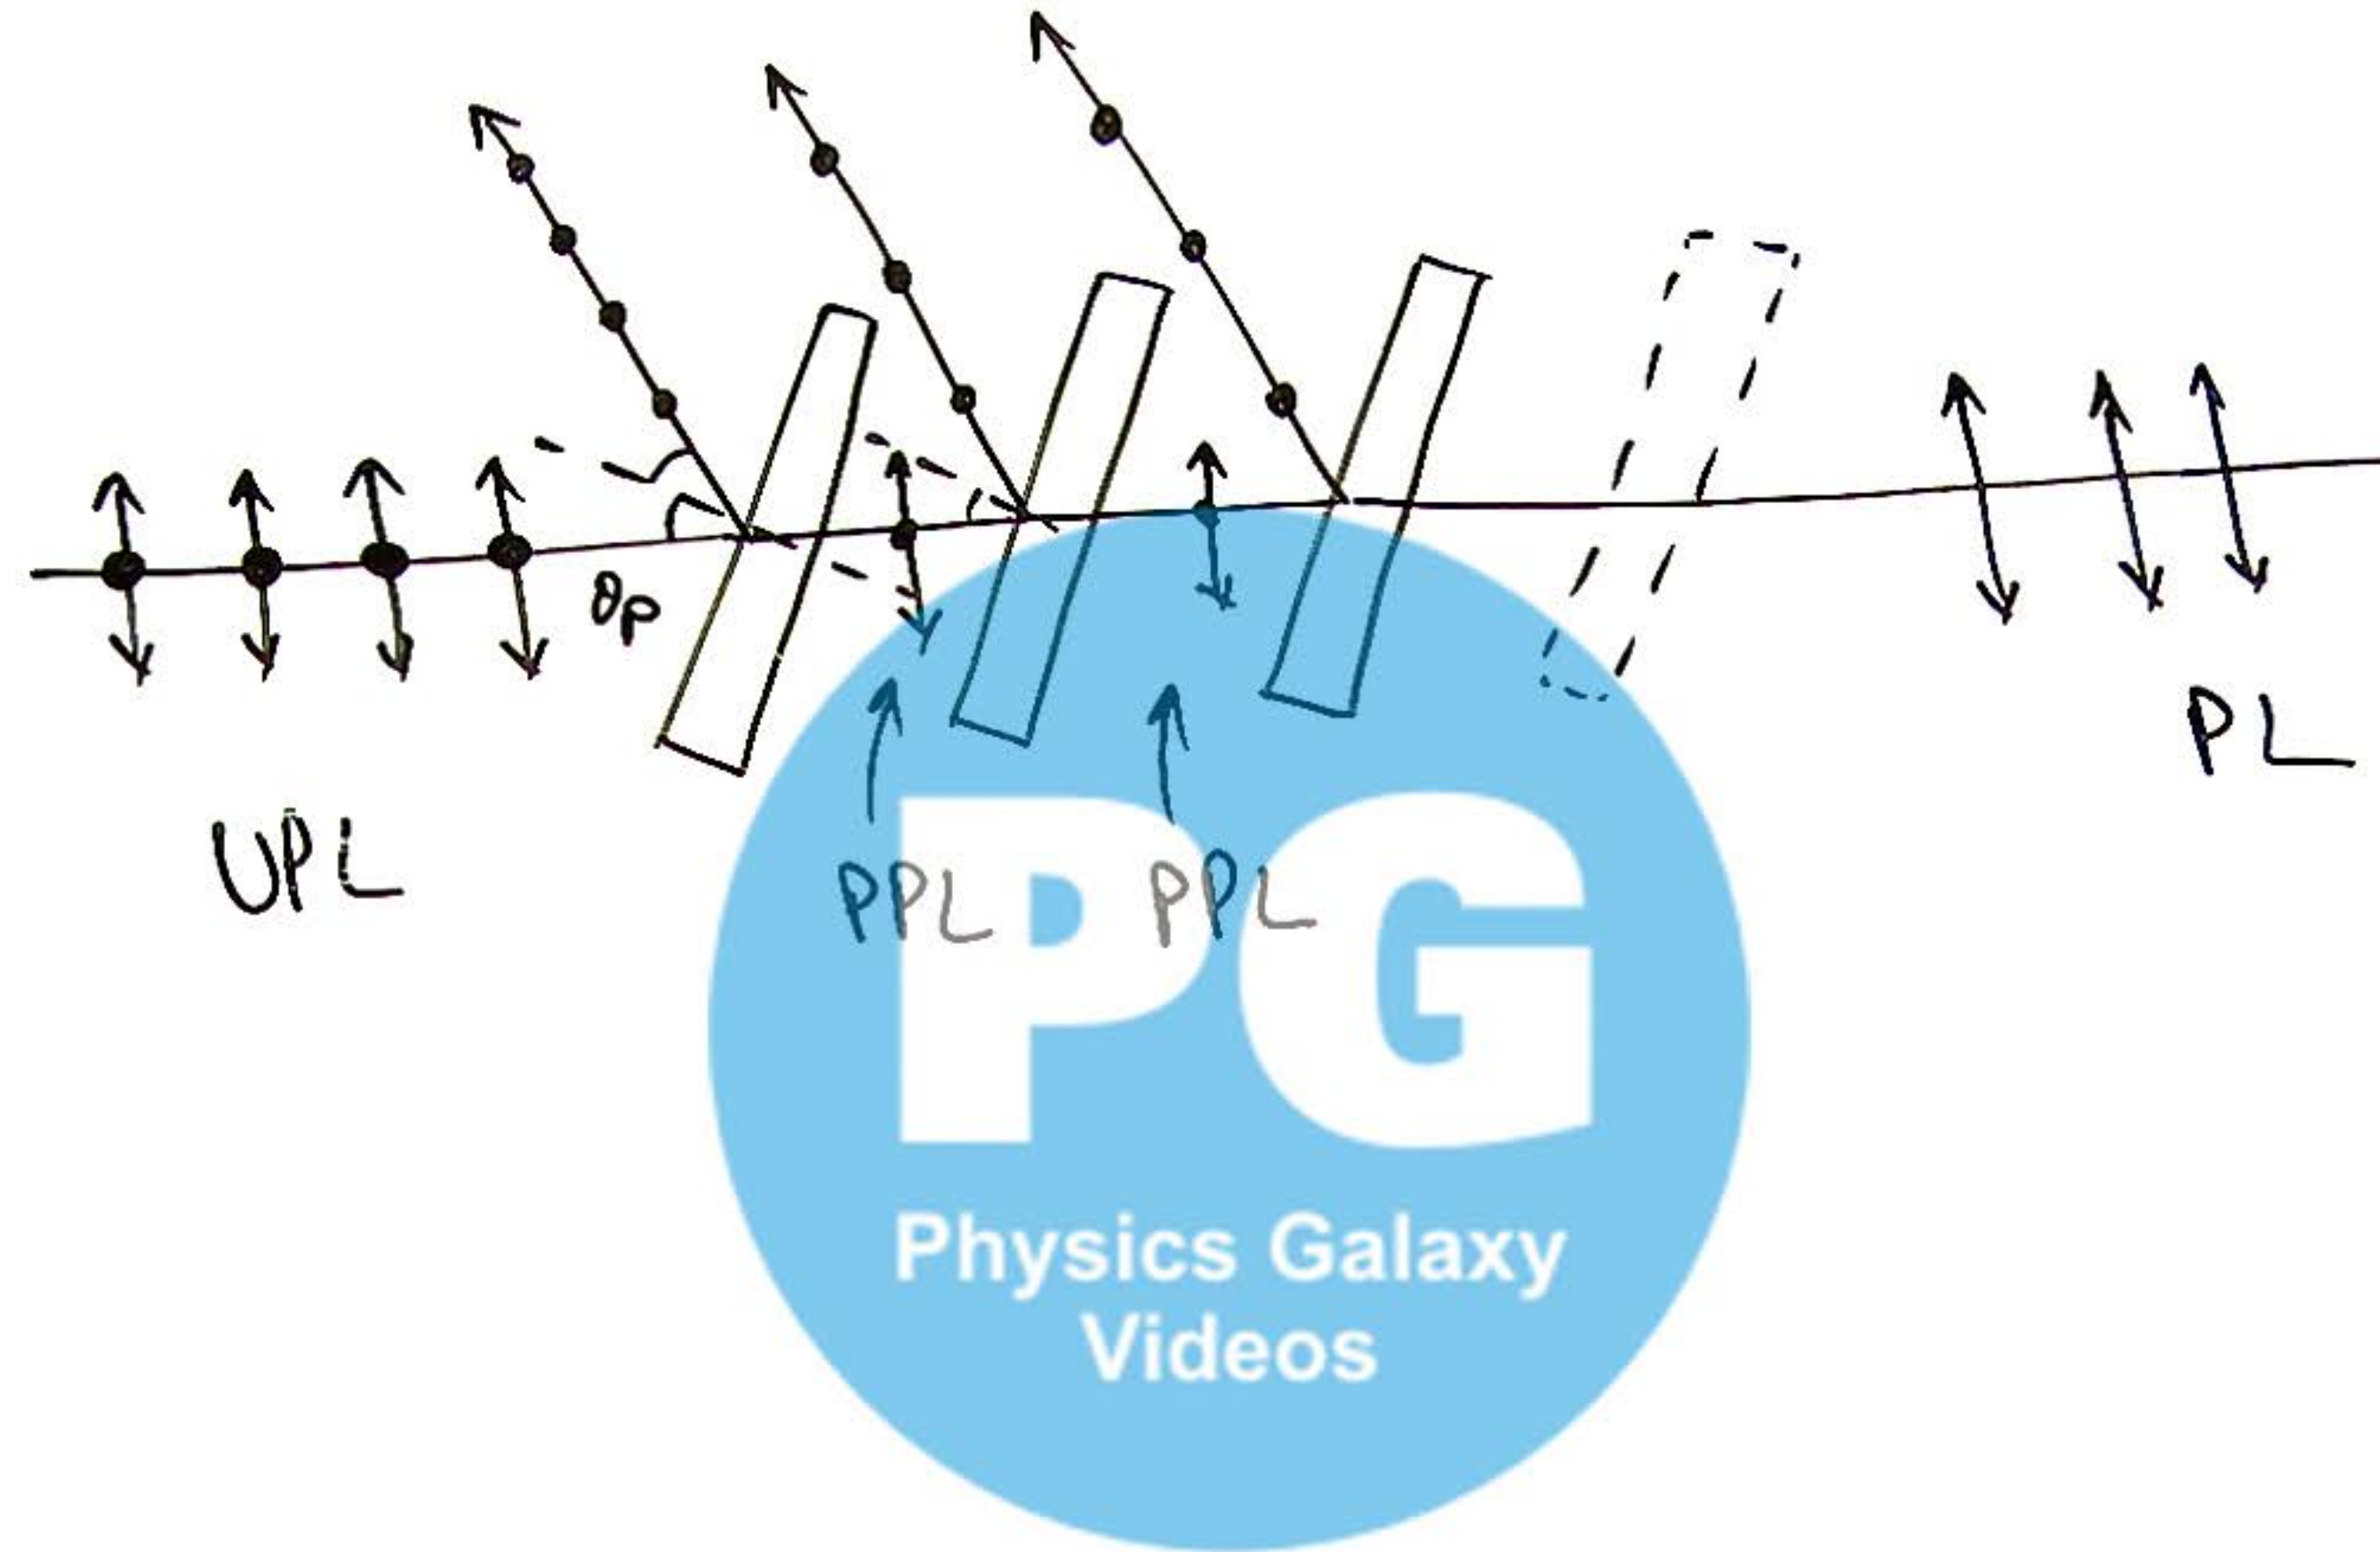

$$\sin \theta_p = \mu \sin(90^\circ - \theta_p)$$

$\mu = \tan \theta_p$ Brewster's law
 ↓
 Brewster's Angle.

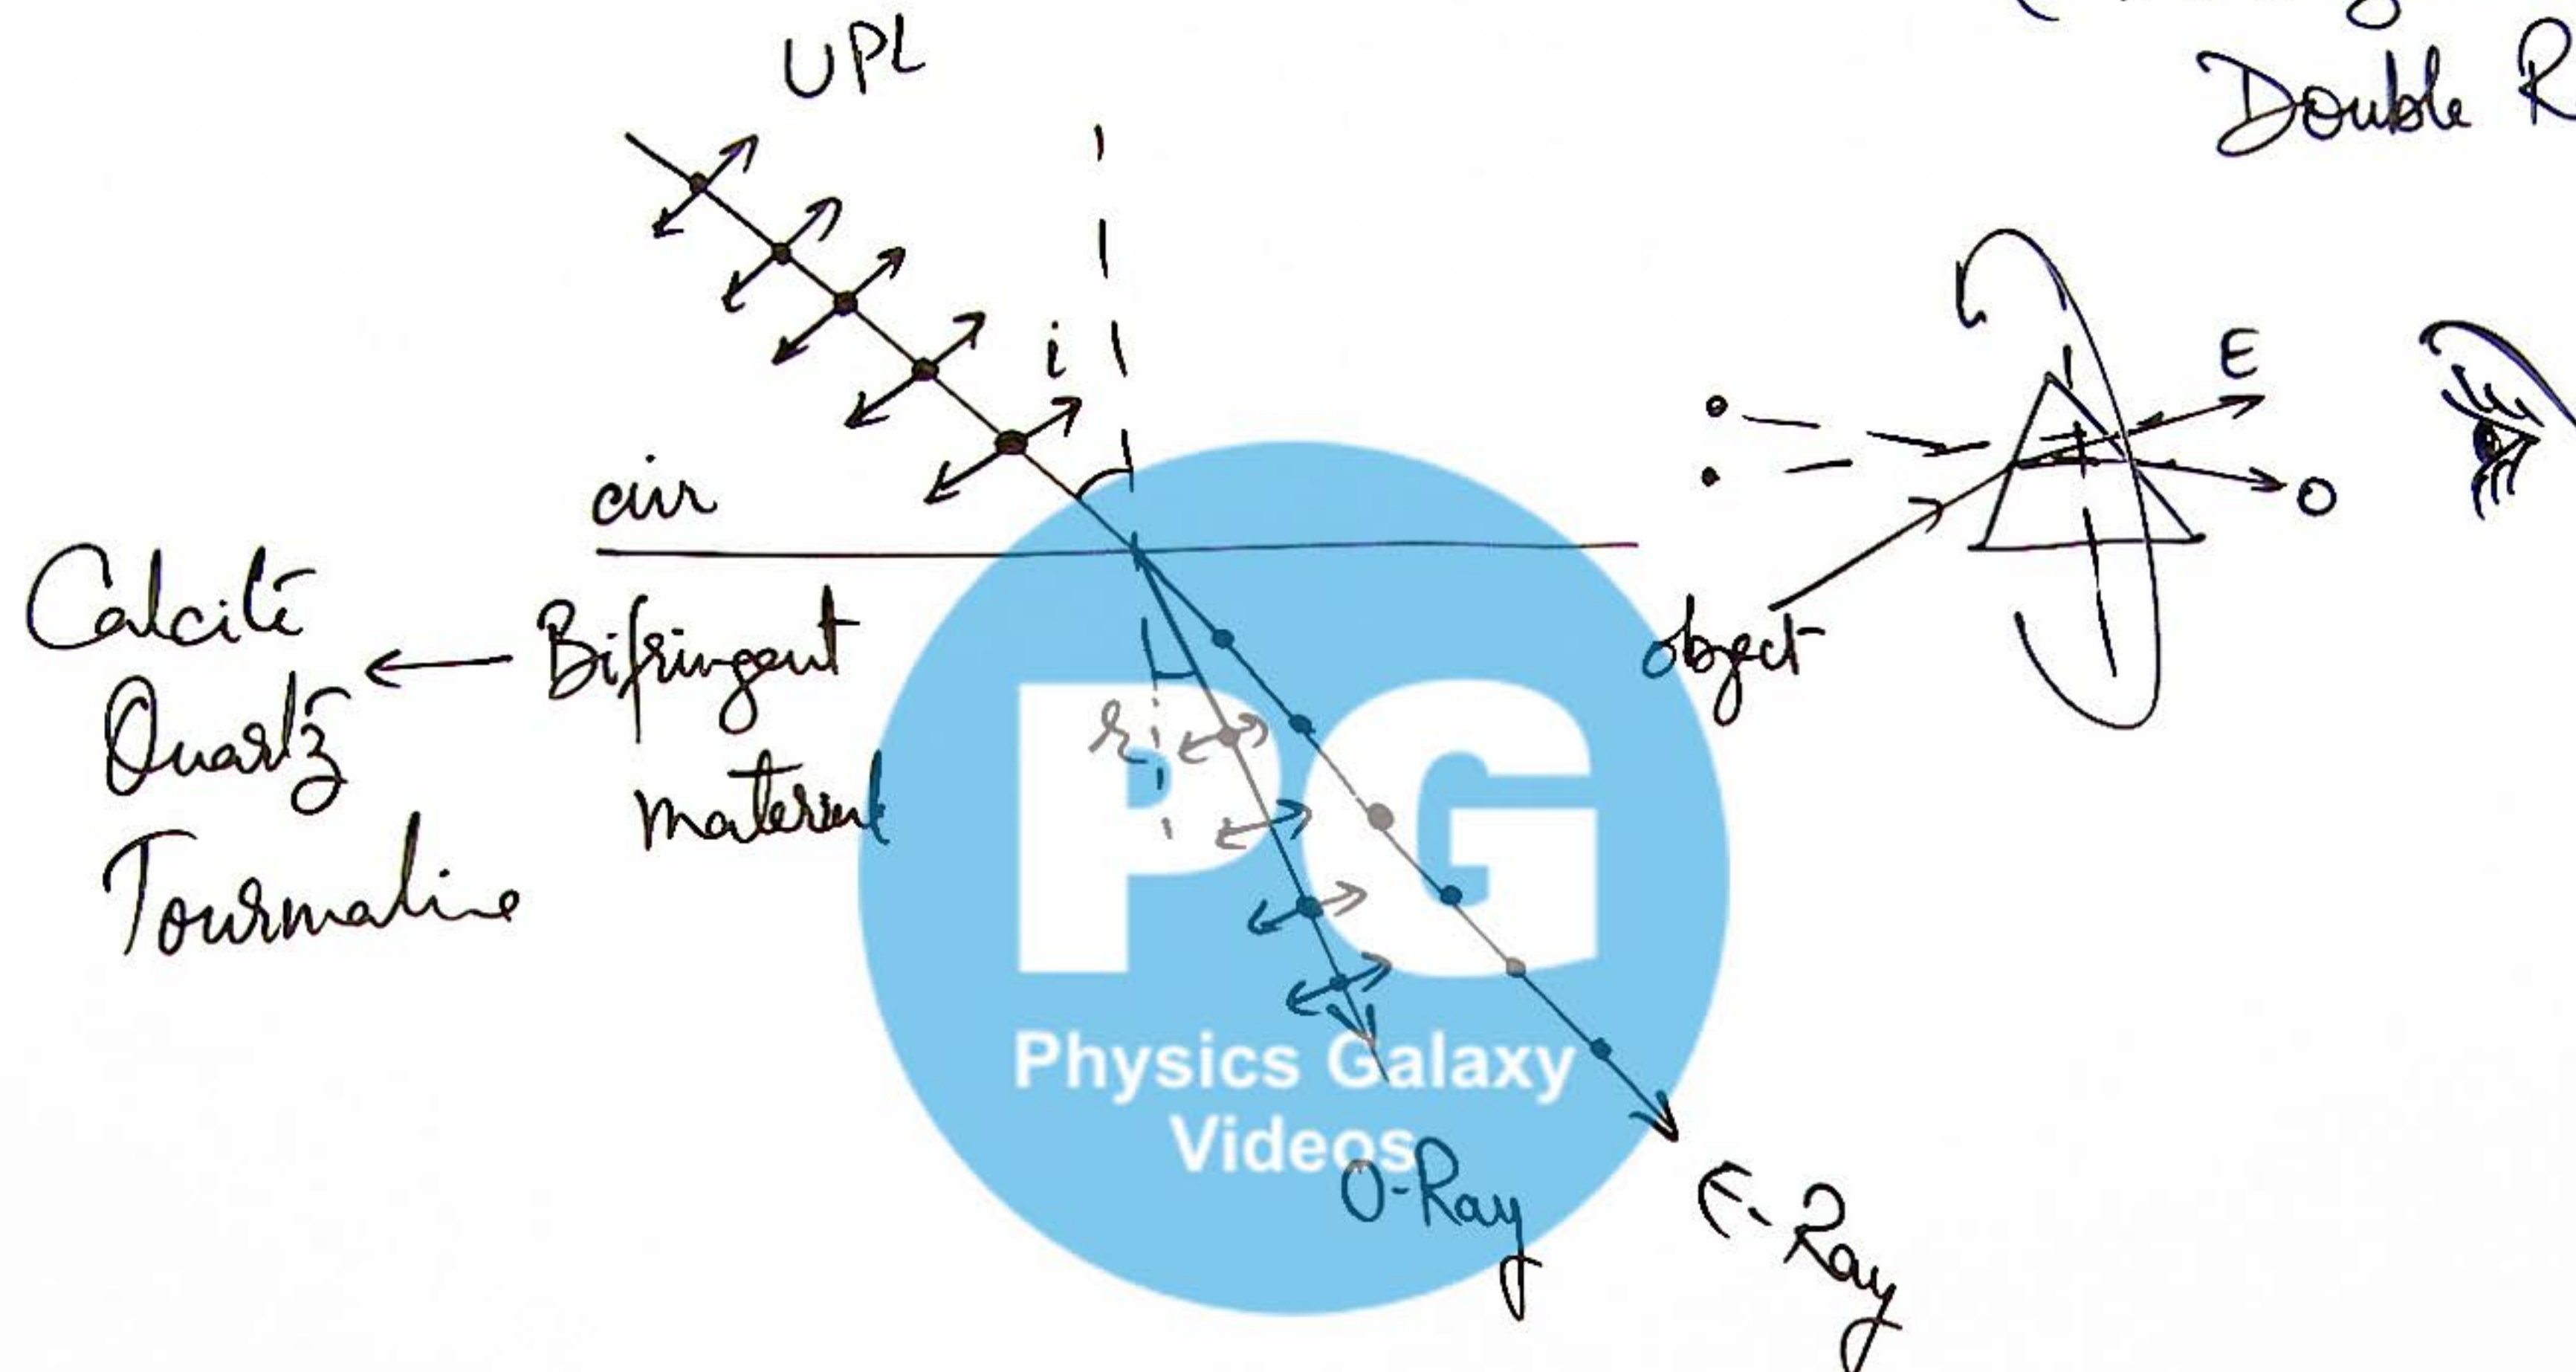

④ Methods of Polarization of Light :

- (i) Polarization by Reflection
- (ii) Polarization by Refraction

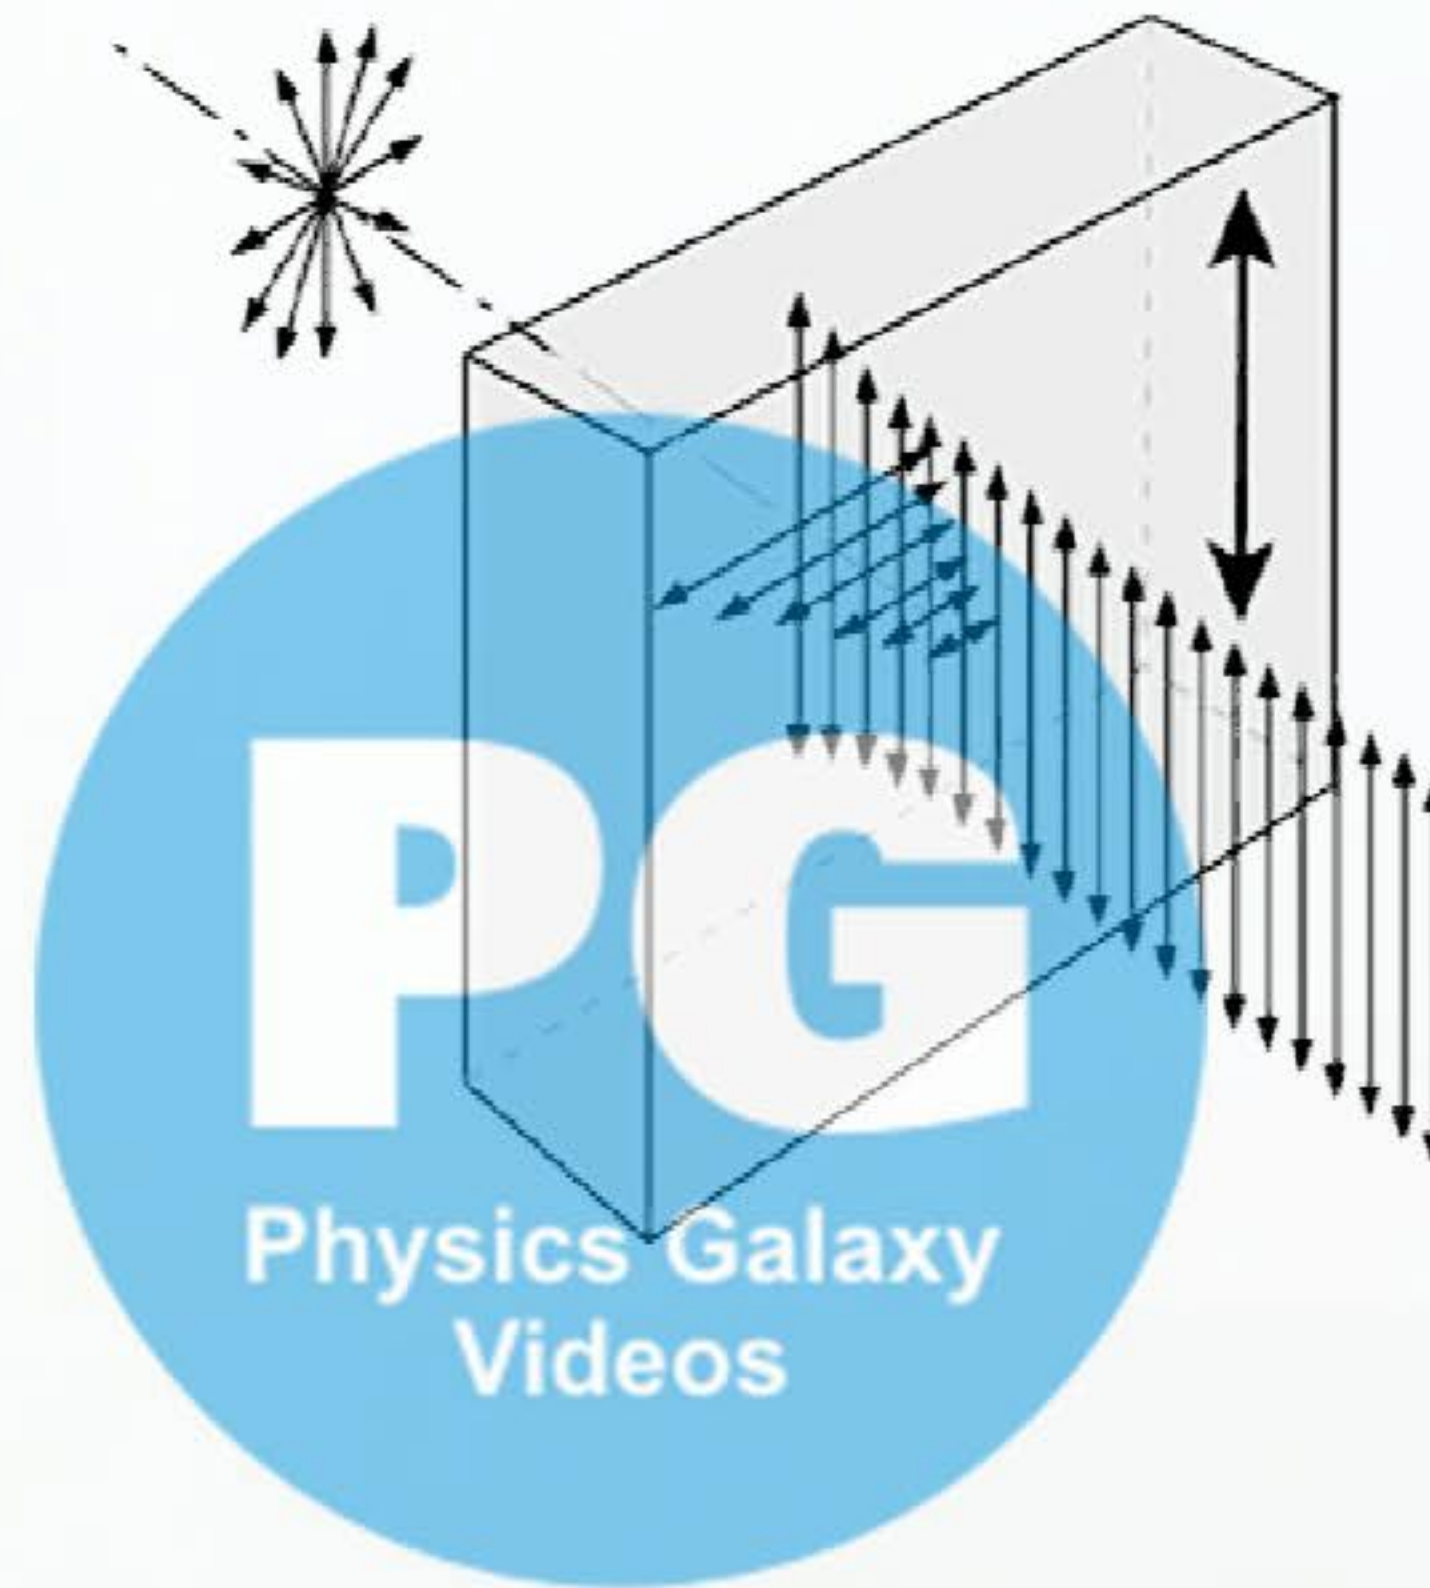

⑤ Methods of Polarization of Light :

- (i) Polarization by Reflection
- (ii) Polarization by Refraction
- (iii) Polarization by Double Refraction

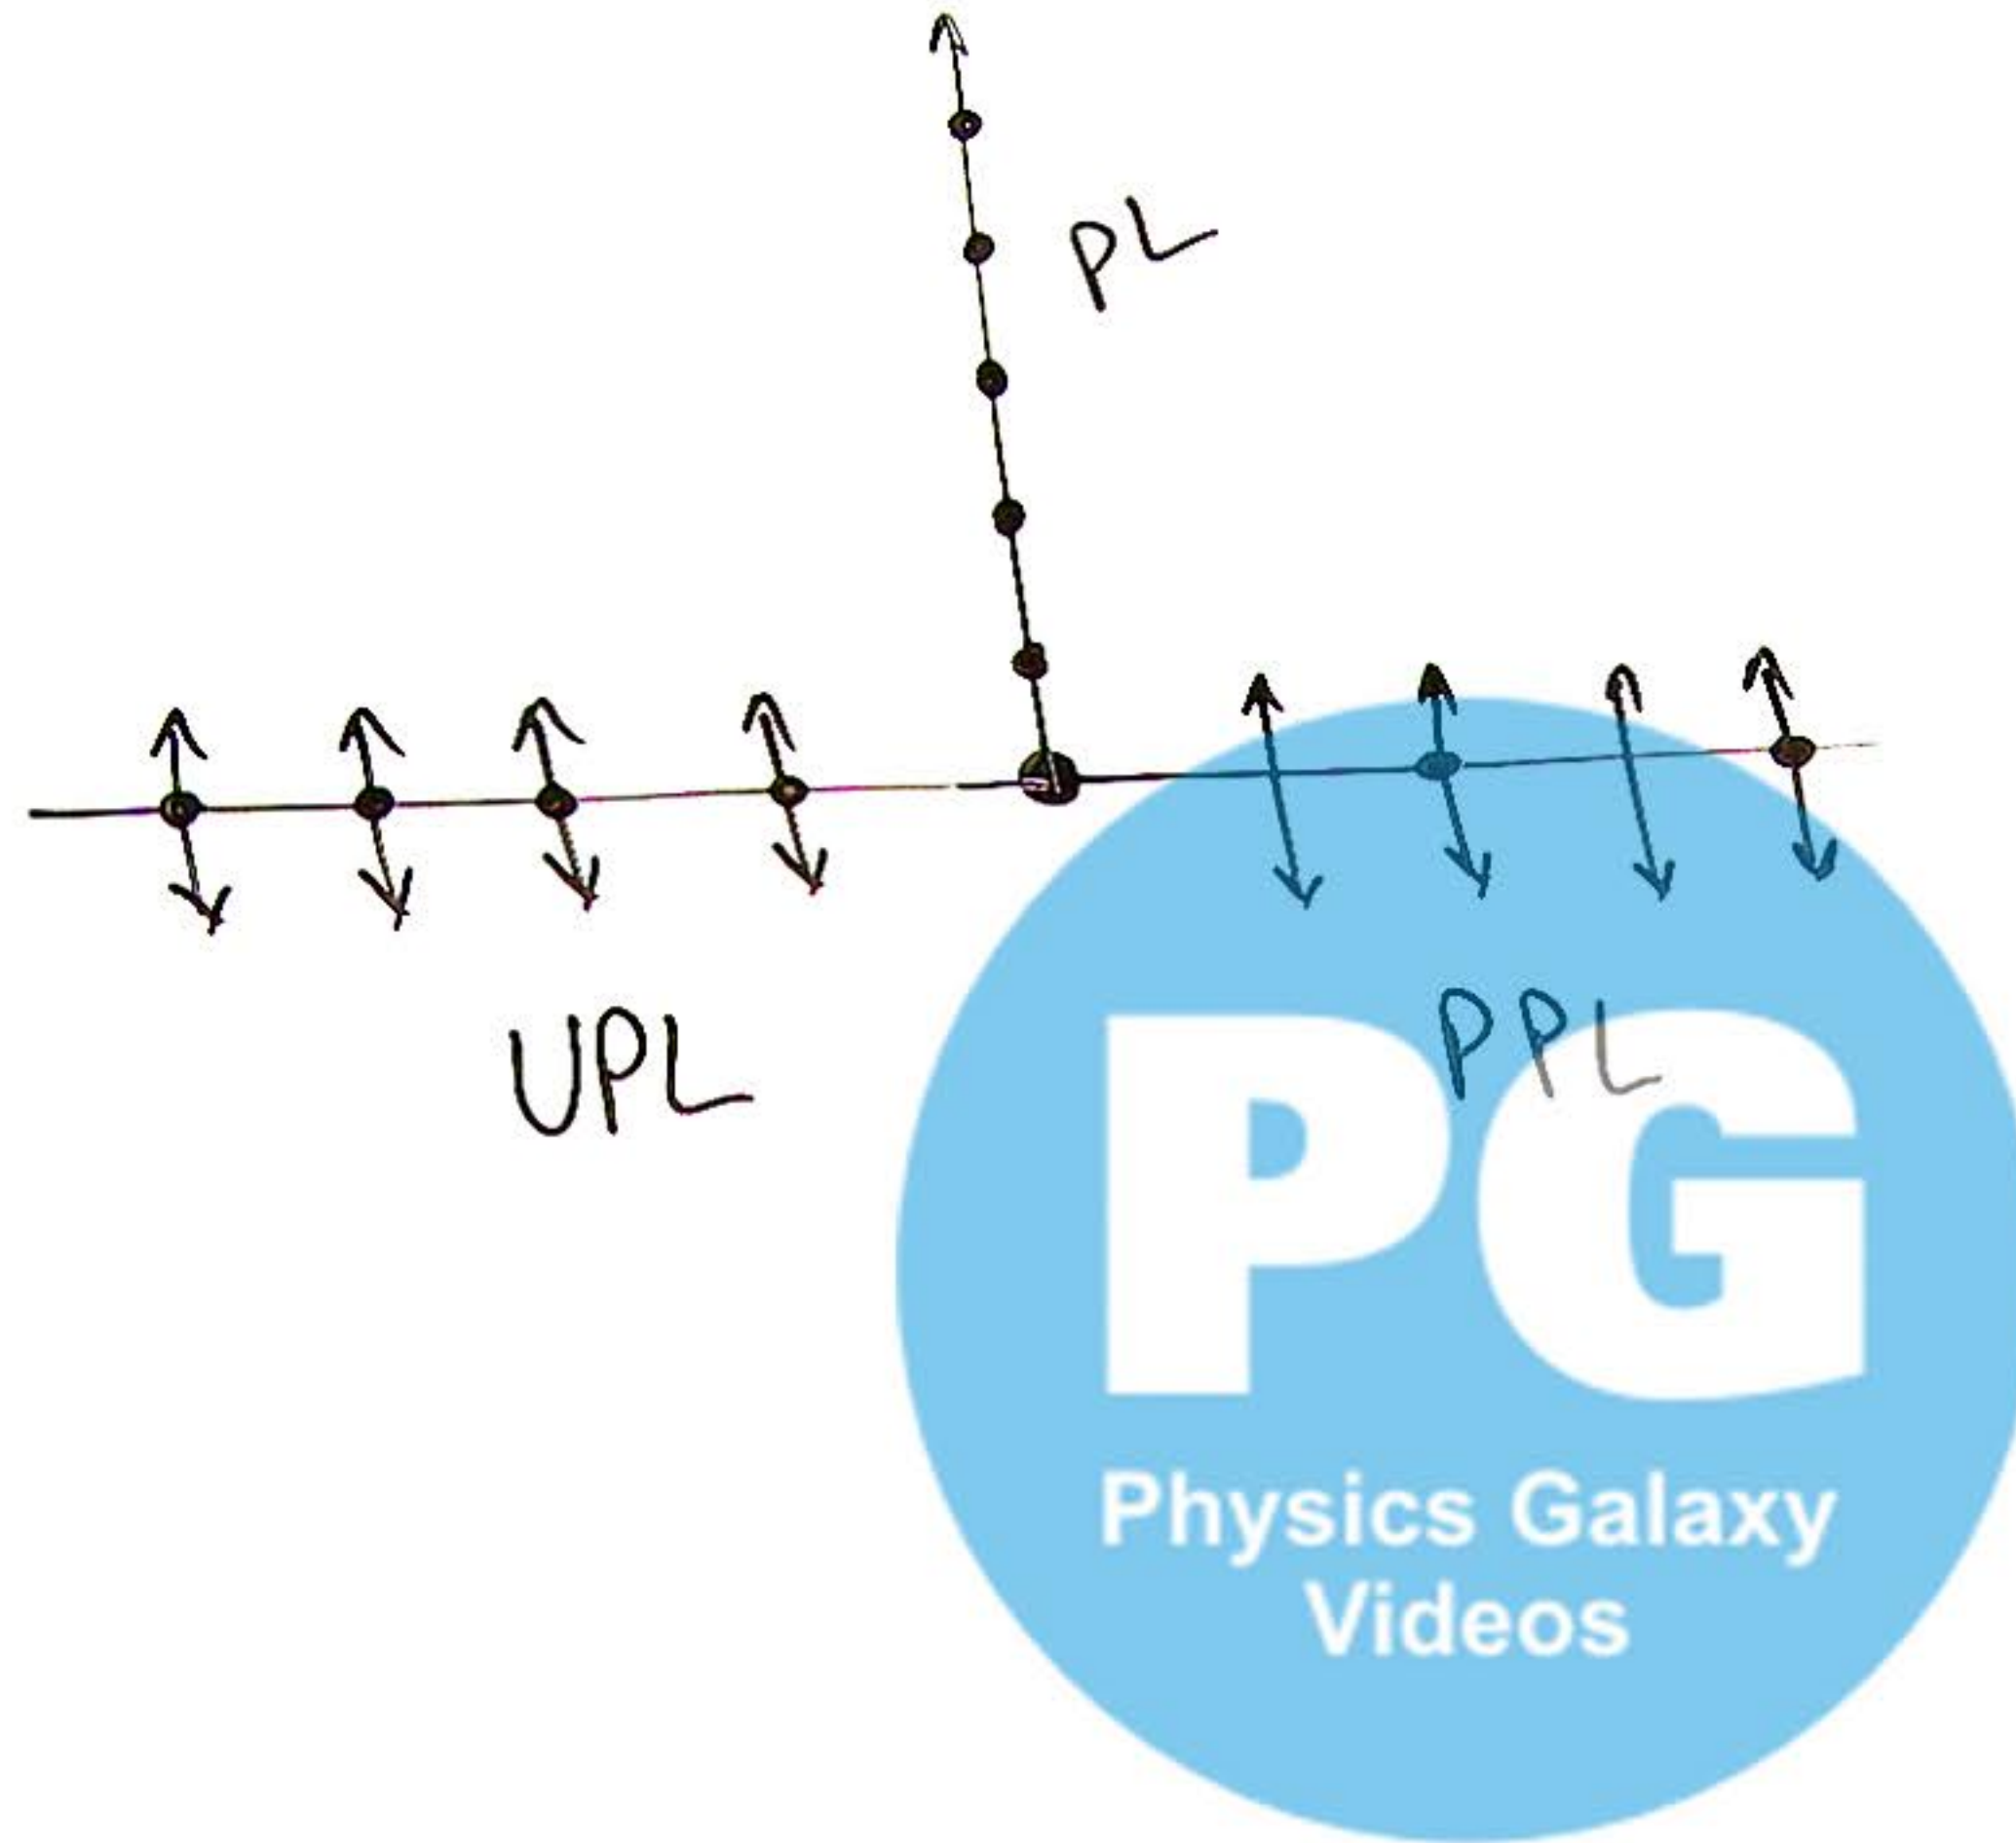

⑥ Methods of Polarization of Light :

- (i) Polarization by Reflection
- (ii) Polarization by Refraction
- (iii) Polarization by
Double Refraction
- (iv) Polarization by
Dichroism

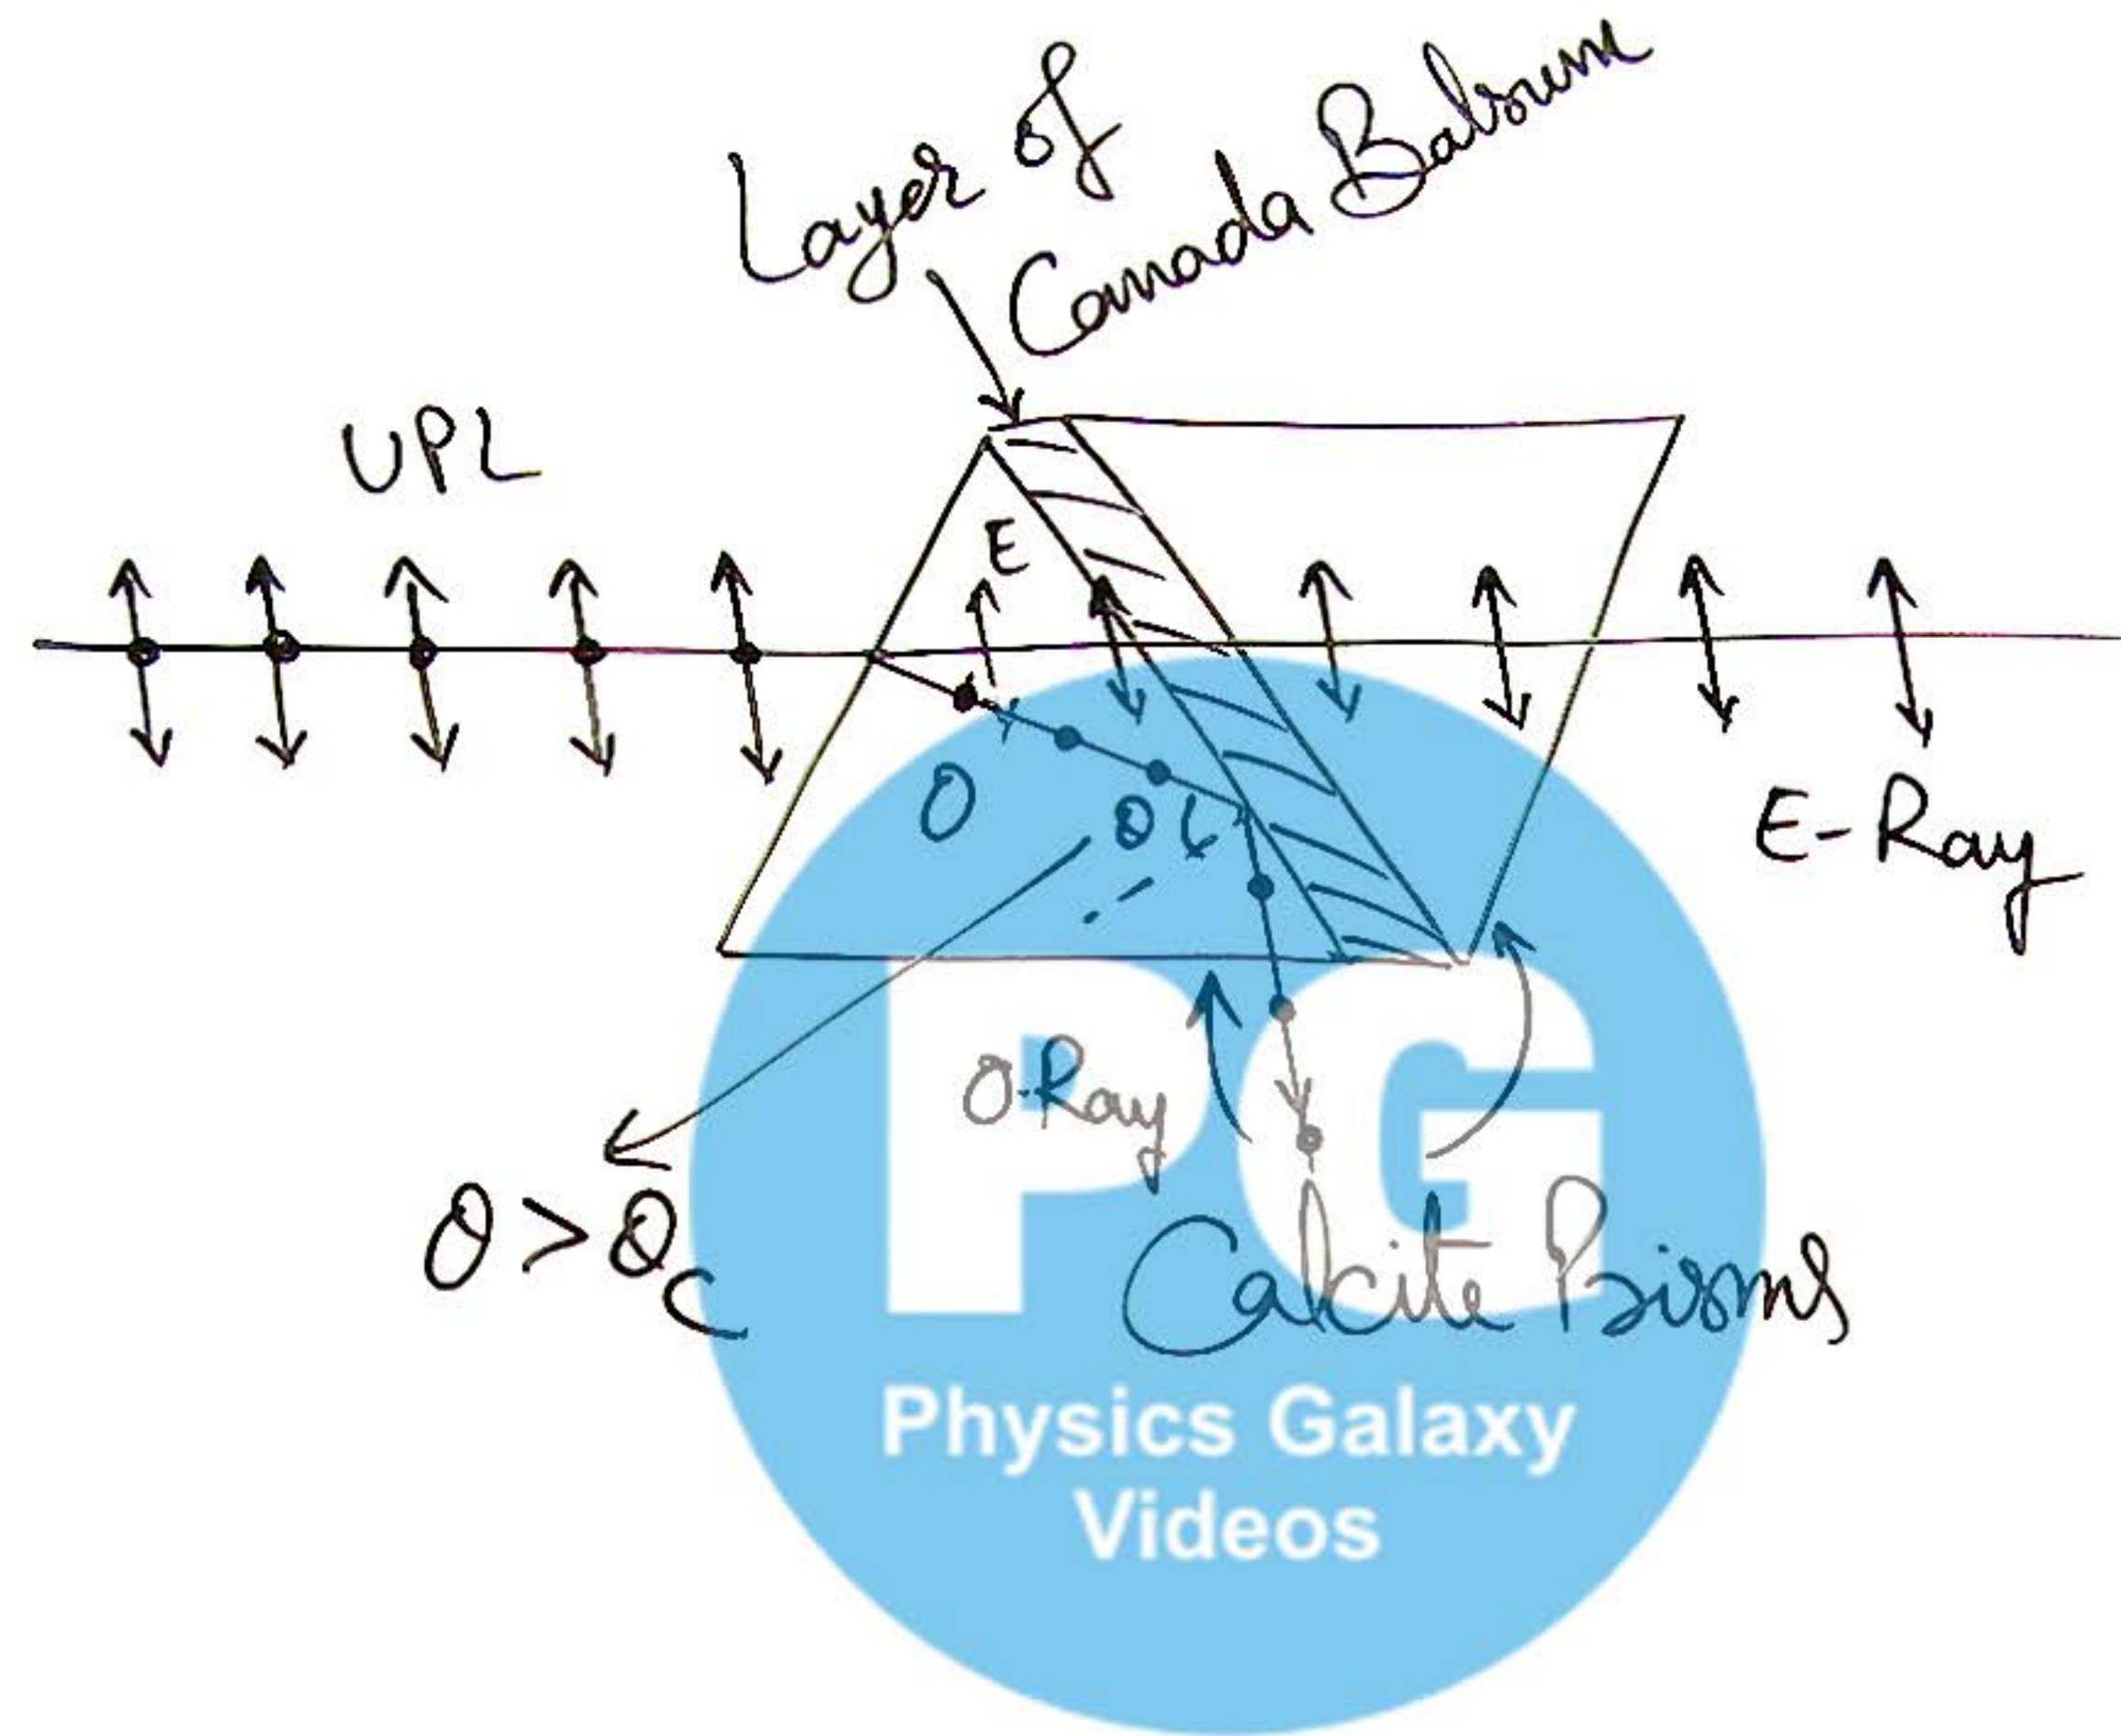

⑦ Methods of Polarization of Light :

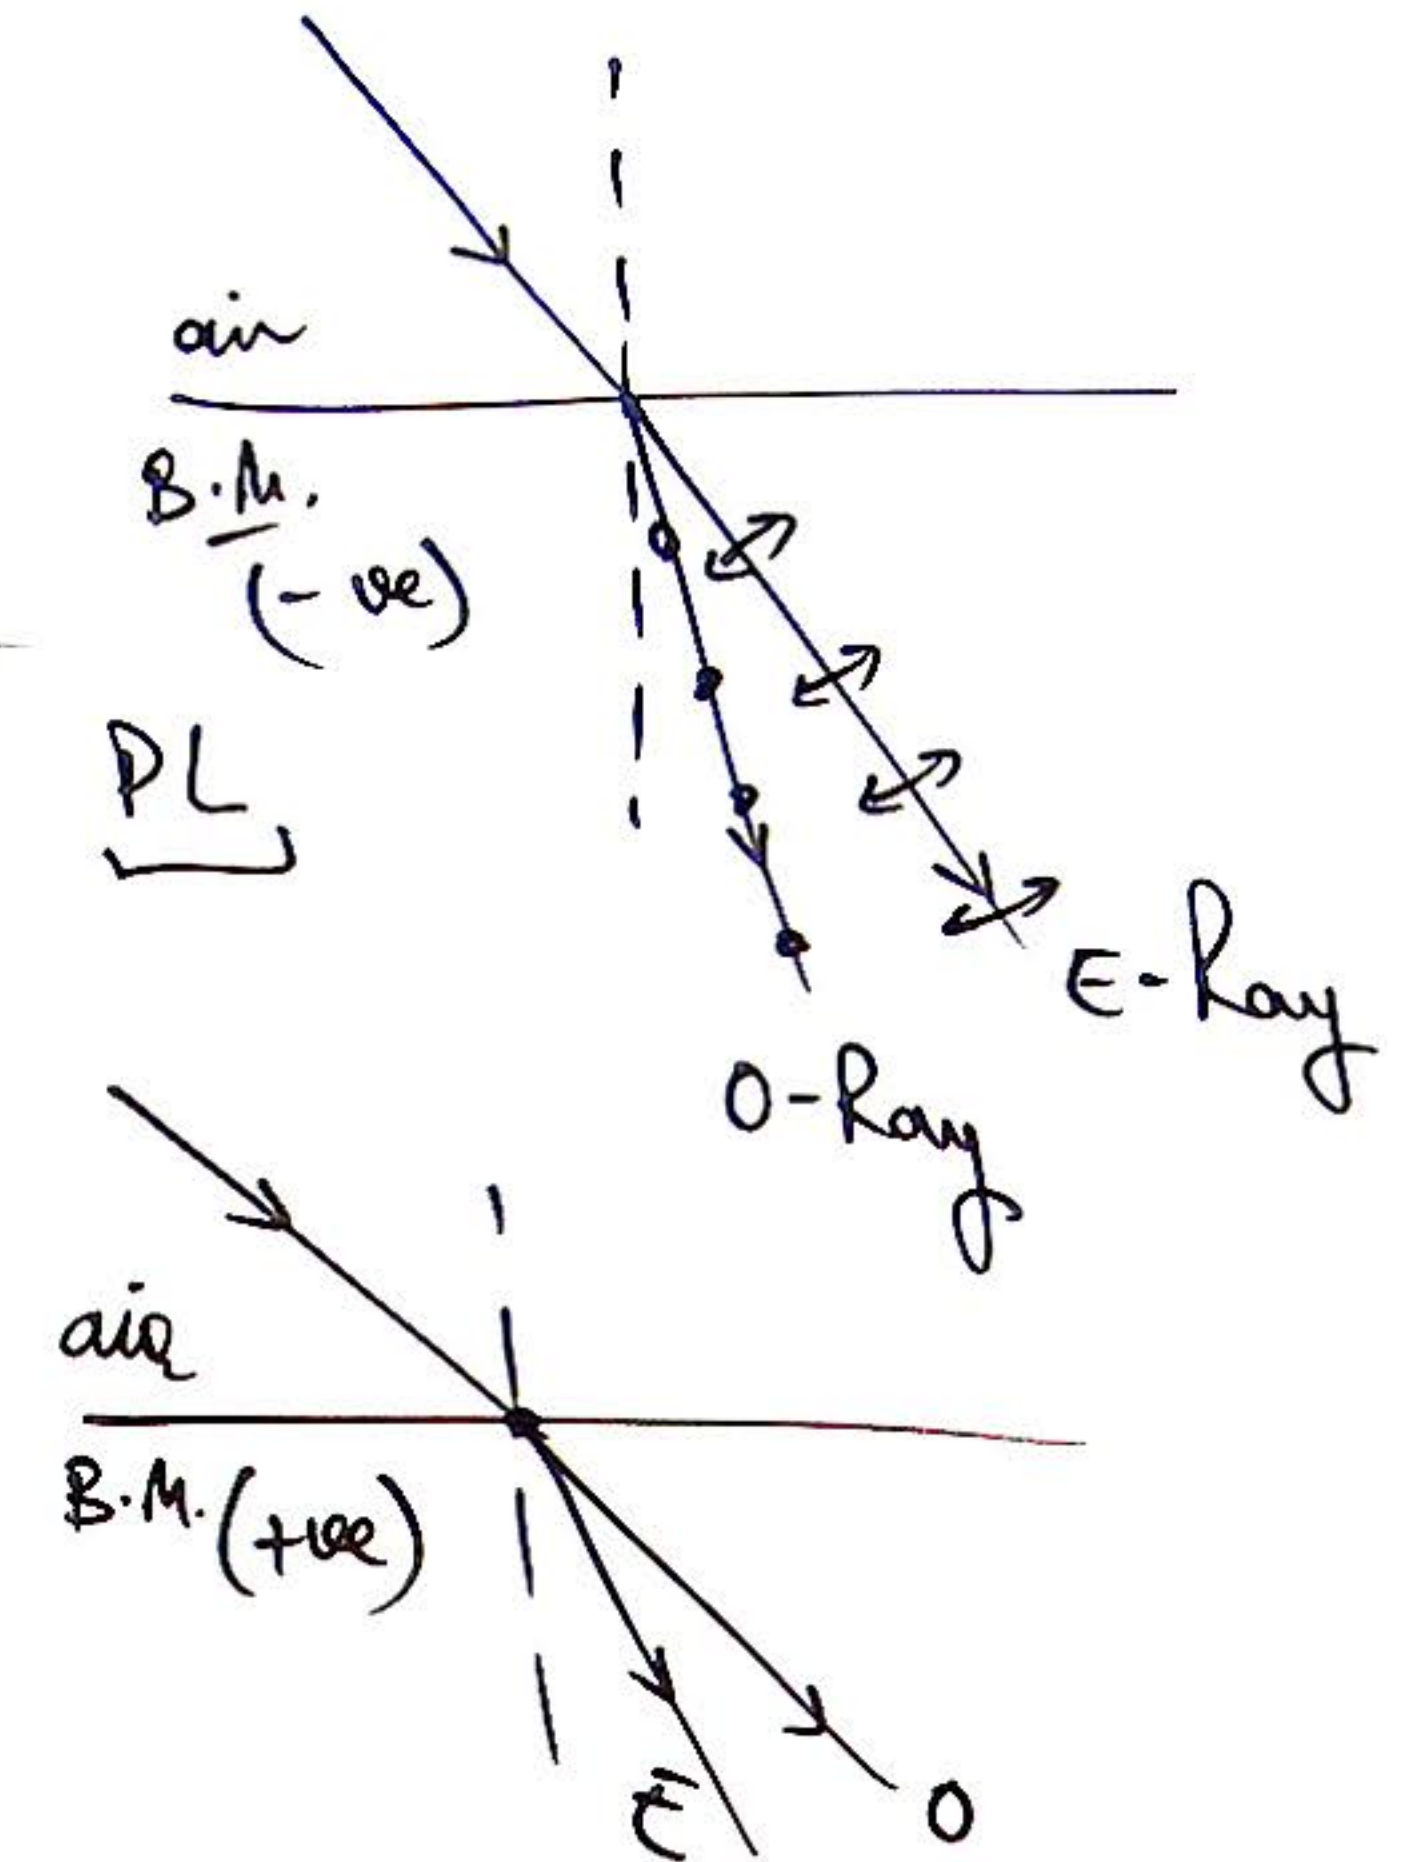

- (i) Polarization by Reflection
- (ii) Polarization by Refraction
- (iii) Polarization by Double Refraction
- (iv) Polarization by Dichroism
- (v) Polarization by Scattering

⑧ Nicole Prism :

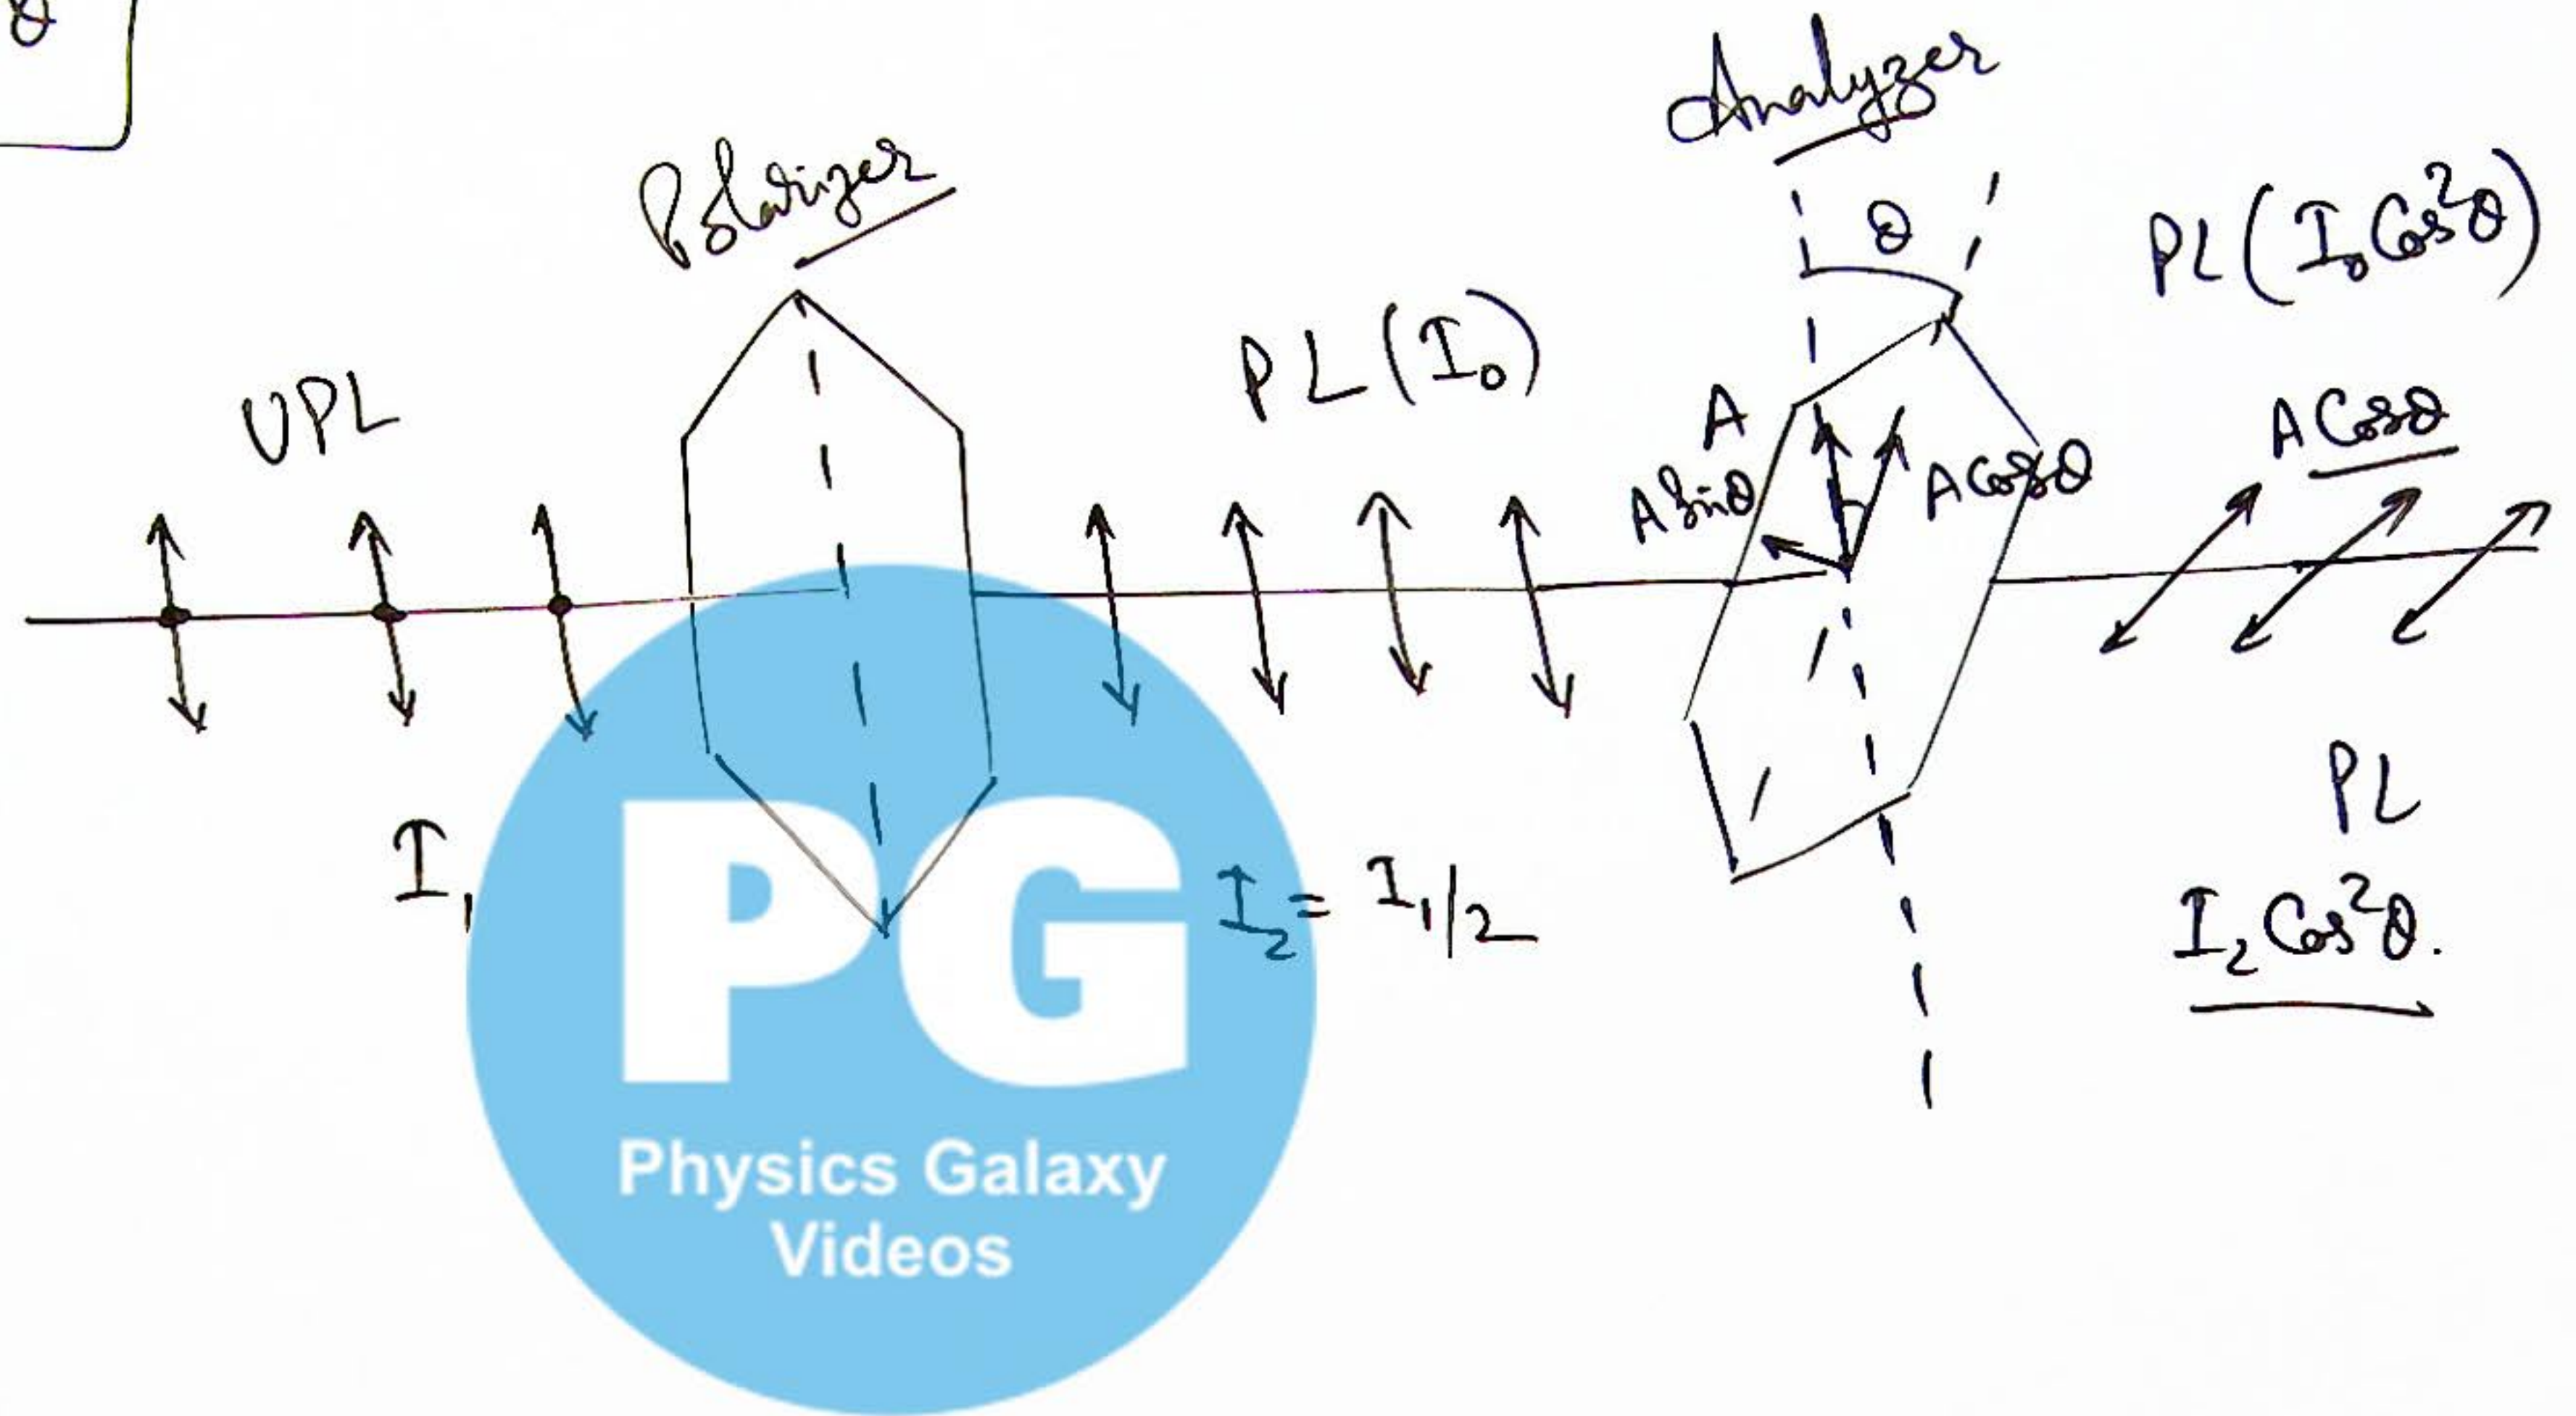

POLARIZATION OF LIGHT

⑨ Positive & Negative Birefringent Material :

⑩ Malus Law:

$$I_p = I_0 \cos^2 \theta$$

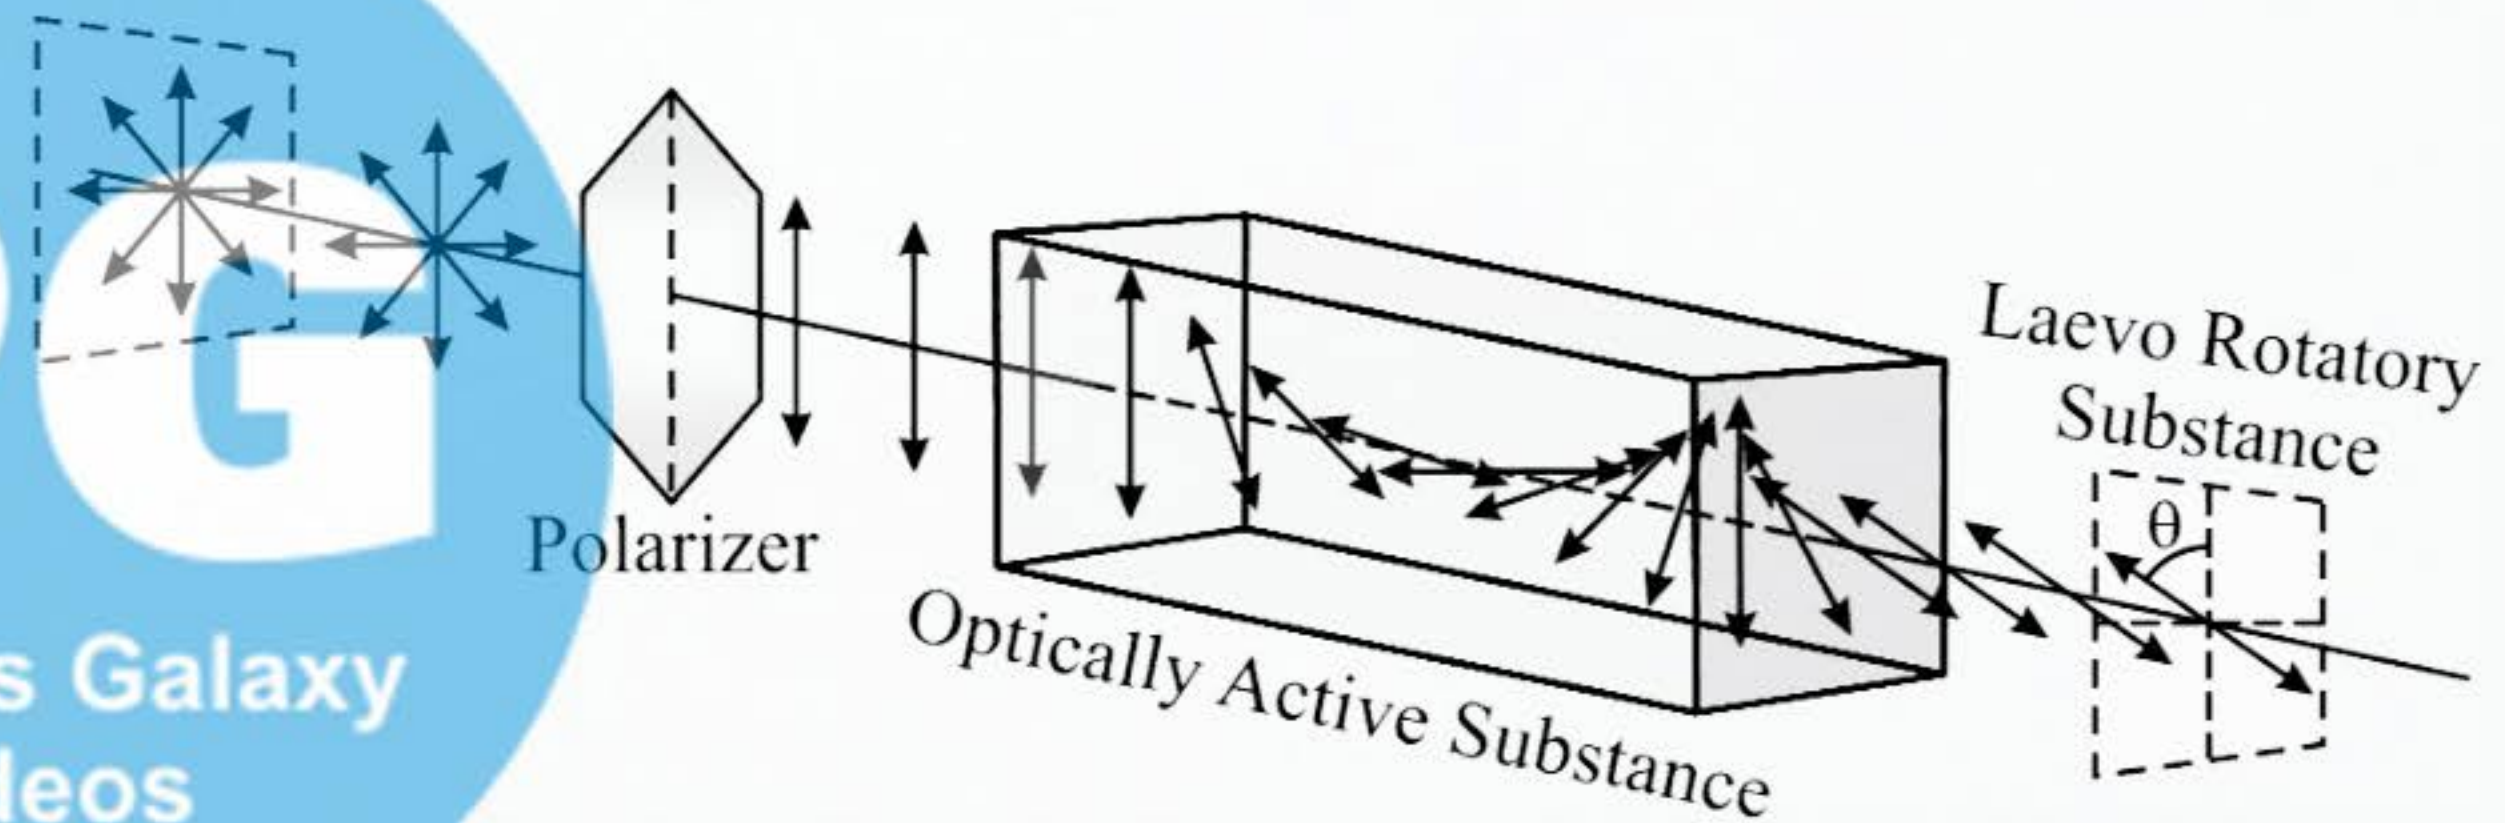

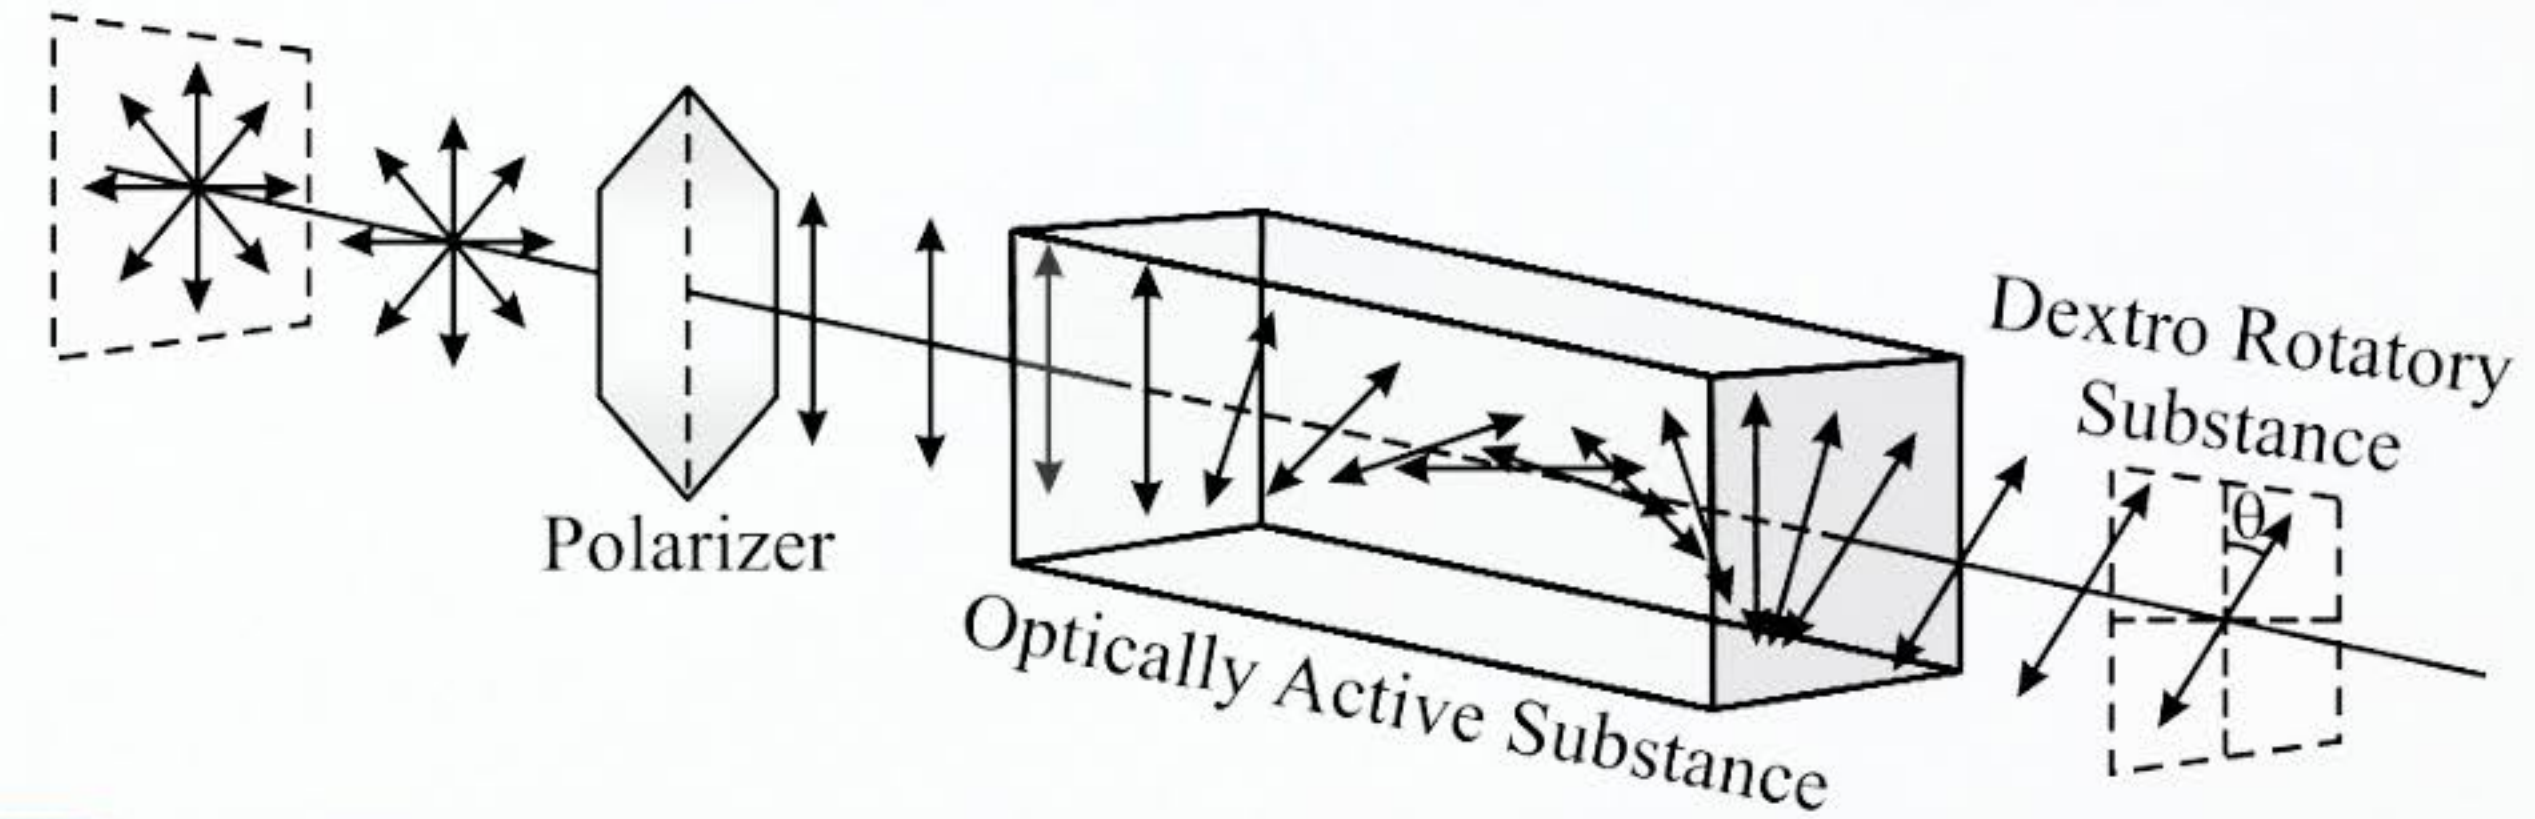

⑪ Optical Activity of a Substance :

Specific Rotation

$$S_R = \frac{\theta}{lc}$$

l (distance) in decimeters

C (Concentration) in gm/cm^3
